the heart, and in the course of time that
delicate but vital organ becomes diseased.

**ECHOES FROM
KINGMAN WRECK**
Injured Brakeman Tak-
en to Los Angeles.

Engineer Who Was Killed Was in
Collision of Limiteds at
Needles.

A remarkable railroad race ended
at La Grande station just at 1:55
o'clock this morning. It was a race
between a special train and Death.
The stake was the life of H. H. Bland,
a young fireman. It is thought that
the train won, and that Bland will
live.

Bland was terribly injured by the
explosion of his engine near Kingman,
Ariz., yesterday morning. One of
his legs was broken in two places,
he was badly scalded, and he sustained
other hurts. The accident occurred
out on the torrid desert, and the
first physicians on the scene despaired
of the poor fellow living long in the
awful heat. This pathetic fact was
wired to the Santa Fe officials in this
city, along with the details of the
blow up.

The local officials resolved to do
all in their power to preserve the
young fellow's life. Instantly a tele-
gram was sent to Needles, the nearest
central point, ordering a special train
to bring the sufferer out of the heat
as quickly as all the railroad forces
there could bring him. It was ordered
to run the train to Los Angeles as
fast as safety and existing schedules
would permit. The physician on the
scene was asked to accompany the
sufferer, and the company surgeons
were ordered to meet the train
and have him conveyed to a hospital
where he could have the best chance
for life. A light locomotive coach
and Pullman made up the railroad
ambulance which hastened from Need-
les, to the scene of the accident and
took the injured fireman aboard. The
start was made for the race to Los
Angeles about 2:30 o'clock yesterday
afternoon, and the special pulled into
this city covered with desert dust at
1:55 this morning. The distance is
over 300 miles, and considering the
lack of preparation, and other condi-
tions, the run is considered quite a
remarkable one.

Engineer R. L. Piche, also of Need-
les, was killed in the explosion which
injured Bland. He was blown 150
feet from the track by the explosion,
and picked up dead. He was engineer
of the Santa Fe train No. 4, in the
collision which occurred between two
limited trains out there a few weeks
ago.

The explosion was a fearful and
peculiar accident. It happened to en-
gine No. 1009, pulling the Santa Fe
Limited, which left Los Angeles at
6:25 o'clock Tuesday evening. It is
presumed water was turned into the
hot boiler, and the engine almost
emptied, and the quick expansion of
steam caused the blow up, the great
boiler being scattered in pieces over a
large space.—L. A. Times.

A Booming Business.

Why yes! Talk about subscriptions,
and newspaper business generally,
"we" have had a burden on "our"
minds which "we" have been want-
ing to unload on "our" readers for some
time but did not have the heart to
do so, for fear it might not be be-
lieved. It really does seem too good
to be true but it is true. A man who
had been taking four Prescott papers,
two from Phenix and one from Ky-
rene, for eighteen years, three months,
and six and a half days dropped into
the office through the front door, just
as the business manager had closed a
contract with a mining company for
\$5,000 extra duty and announced
that he would rather have one copy
of the Journal-Miner than any six
other papers in the United States, and
that he had just sent a discontinu-
ance order to all of the above papers,
and ordered six copies of his favorite,
left each evening at his residence. In-
stead of the one he had been taking for
thirty four years and six months. He
explained that there was such a
scramble between the old woman and
four children to see who could get the
paper first to read it that he wanted
a copy for each child.

While the subscriptions are rolling
in at the rate of forty one a day for
the daily and 117 for the weekly, with
cash tags attached to each order, such
a wholesale order as this from one in-
dividual was such a stunner that the
business manager has not recovered
yet. It was partly on account of his
indisposition from this shock, which
threatened to result in an attack of
nervous prostration, that "we" re-
frained from mentioning the incident
sooner.

But say, if you don't think we are
just watch "us" smoke and then
toss!

P. S.—Since the above has been run
through "our" Simplex type setting
machine without the break of a single
dot, a man from Ash Fork has just
been in and purchased fifteen cents
worth of old papers, all the "left
overs" in the shop, for his wife to fix
up her pantry shelves with. You bet
there is something doing in this shop
all the time.
